

6 STEPS

Transitioning to MethodOne

Change can be hard, but it doesn't have to be. We understand that moving from paper to a fully electronic record or even changing from one system to another is a major transition for you and your team. We are here to make sure this process is smooth and simple.

1

DEMO: We will provide a remote demonstration of the system.

2

DECIDE: You and your team can discuss and determine if M1 fits your needs.

3

SETUP: We will setup your site for you to explore before going live.

4

IMPORT: We can import various types of data from many other EMR providers.*

5

TRAINING: As a part of your transition, we provide 8 hours of training for you and your team.

6

GO LIVE: After training and verifying your data, you're ready to go live!

*Note: While we guarantee to do everything we can to import your existing data, a large portion of the import process is reliant on what we receive from your current provider. If there are issues receiving or importing your data, we promise to work with you to find an option that works for you.
